

Hege 30

Plot sprayer

Plot sprayer Hege 30 has been specially developed for the exact distribution of liquid chemicals like plant protectives and liquid fertiliser.

Your benefits summed up:

- Height adjustment of spray booms allows for the use during different development stages
- Easy adjustment of the spraying rate
- Even longitudinal and transverse distribution
- Simple control of operating pressure due to a precision gauge
- Isolate section system enable for an optimal adaptation of the working width to the plot width

Technical Data

Basic machine

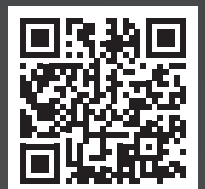

Attachment facility	3-point hydraulics of tractor KUBOTA plot tractor Hege 76 tool carrier
Volume	300 l
Membrane pump	114 l/min
Spraying boom	6 m, 8 m, 10 m oder 12 m, mechanical foldable, with 3 sections

Dimensions

Length	approx. 2000 mm
Width	approx. 800 mm
Height	approx. 1800 mm
Weight	from 130 kg upwards, depending on specifications

Options

- Electrically switchable sections
- 2 l chemical lock with canister cleaning
- Internal container cleaning nozzles
- Primer
- Liquid fertilizer equipment
