

Smart Lab

Automatic seed processing line

Smart Lab Core

Smart Lab Plus

Your benefits summed up:

- **Process quality**
 - Best coating quality due to the automated weight-based coating fluid application system
 - Reproducible process guarantees uniform quality of seeds
 - Minimal residue thanks to integrated weighing during filling
 - Seed counting instead of volumetric filling for exact sowing rates
 - Error elimination based on end-to-end-seed logistics and process documentation
- **Performance**
 - Elimination of transport and layover tasks
 - Shortest cycle times thanks to parallel weighing, picking and counting processes
 - 7 sec. cycle time (up to 500 samples per hour in corn)
- **Ergonomics and Flexibility**
 - Operator safety: Seed coating in enclosed aspiration system
 - Flexible system for envelopes and container system
 - Loading and unloading the machine in ergonomic positions

Filling options	Envelopes and/or container system
Crops	Cereals, corn
Cycle times	7 sec. for 100 grains of corn (Seed Count S/R60), 12 sec. for 1.000 grains of wheat (Seed Count S/R60)
Max. filling quantity	Up to 4 liters per batch
Counter option	Data Seed Count S/R25, S/R60
Energy supply	1AC 208-240V 50/60Hz
Dimensions Smart Lab Core	Length: 1.813 mm with filling for container system Width: 951 mm Height for S/R25 and S/R60: 1800 mm Weight: ca. 200 kg
Dimensions Smart Lab Plus	Length: 1537 mm Width: 1813 mm Height: 2648 mm Weight: ca. 700 kg
